

VERSA-LOK CLEANCUT

SQUARE FOOT RETAINING WALL SYSTEM

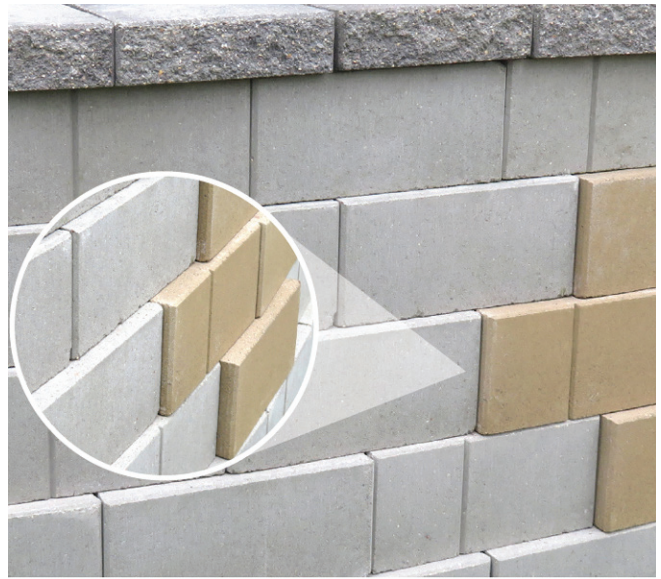

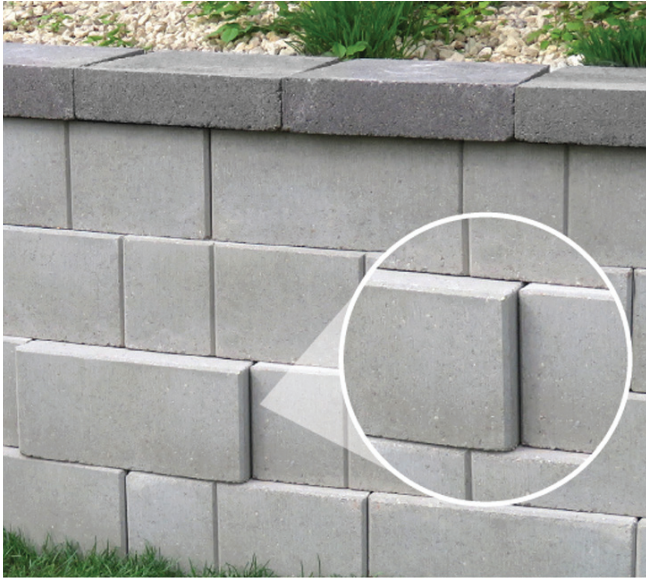

MEET THE NEW FACE OF VERSA-LOK

The new CleanCut™ texture is revolutionizing all you can do with VERSA-LOK Square Foot™ segmental retaining wall units. Square Foot is VERSA-LOK's premium cored unit that delivers a full square foot of wall face economically, making it a low-cost alternative for many commercial applications. The CleanCut texture offers a crisp, clean, contemporary look. This texture can be used by itself to offer customers new design options in color, surface and dimension. Square Foot CleanCut units can be combined with Square Foot's split-face texture or used alone.

- The unique design of Square Foot CleanCut units allows for multiple setbacks, giving added dimension for a distinctive wall face design.
- Square Foot's trapezoidal shape and top-pinning system allow for variable bond construction, accurate alignment, tighter vertical joints and easy installation.
- Easy to install on a 6-inch-thick crushed gravel leveling pad; no concrete frost footings required.
- All Square Foot unit cores are filled with crushed gravel in the base course and free-draining angular gravel in all other courses.
- Finish off with VERSA-LOK cap units.

VERSA-LOK CLEANCUT

SQUARE FOOT RETAINING WALL SYSTEM

VERSA-LOK CleanCut units features pinned offsets to create dimensional wall faces and can be used with contrasting colors or textures to create new design options for random-pattern walls.
